

Anthos Create

Accelerate your cloud journey with Google Anthos

The Challenge

As enterprises race to adopt cloud, nearly a 28% adoption increase by 2022, we are seeing an increased desire to move faster and scale quickly. These IT leaders want to achieve the promise of 40% savings with flexibility and scale across cloud providers. With **75% of workloads still on-prem**, these leaders are facing regulations limiting cloud adoption, difficulty managing open source Kubernetes, and challenges operating multiple environments consistently.

Google Anthos Allows you to:

 Modernize on-prem or in the cloud

 Automate policy and security at scale

 Provide a consistent management experience

Anthos Create

The *Anthos Create* engagement helps enterprises evaluate their readiness and execute a plan towards hybrid cloud transformation. At the end of the short engagement, you will have your prioritized Anthos workloads deployed, detailed design documents, runbooks, a clear roadmap for hybrid cloud, and first-hand organization experience with Anthos.

Key Phases, Goals & Deliverables

Align & Design (2-4 Weeks)

Align & establish goals with clear engagement and measurable success criteria. Design infrastructure architecture and plan the migration of prioritized workload.

DELIVERABLES

- Customer hybrid cloud strategy
- Anthos design architecture based on Google best practices
- Prioritized workloads for development
- Delivery and risk mitigation plan

Setup & Deploy (6-8 Weeks)

Develop IaC to create repeatable environments. Implement as per design security in-depth, networking, K8s clusters, Istio & Anthos Service Mesh and CI/CD pipelines. Deploy the prioritized workload via the CI/CD pipeline.

DELIVERABLES

- Documented and deployable examples of priority workloads
- Refined and updated design document
- Creation of Monitoring, Maintenance, Logging, Troubleshooting, and Runbooks

Closeout (1 Week)

Wrap up final documentation and readying the environment and present project results & roadmap.

DELIVERABLES

- Completed detailed design documents
- Recommendation on next steps
- Final readout presentation

KIN+ CARTA

Kin+Carta is a global digital transformation business and premier Google Cloud consulting partner. We make the journey to becoming a digital business tangible, sustainable, and profitable.
